

ArtioSign

A blue-tinted photograph of a modern hotel lobby. Several large digital screens are mounted on the walls. One screen on the left shows a soccer match. A central screen displays "Sunset Resort" branding, a "Breakfast Bar" menu with food images, and a "NEWS" segment featuring a man in a suit. Another screen on the right shows a woman's portrait. People are seen walking through the lobby in the background.

Digital Signage + IPTV in One

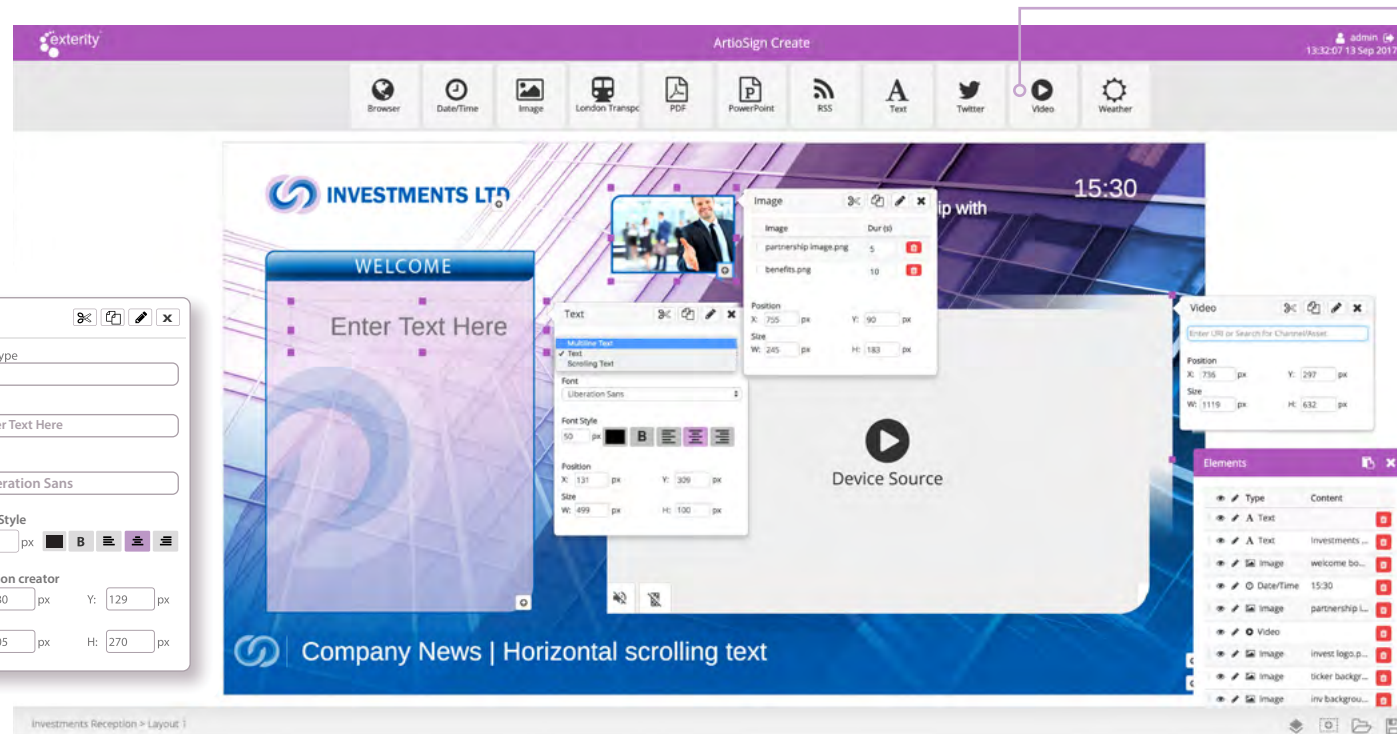

Create, manage and display eye-catching, dynamic HD digital signage with ArtioSign. A natural enhancement to an IP video system, Exterity's integrated solution makes it easy for any organisation to create and deliver impactful signage screens.

Designed for organisations that want to install multiple displays to enhance employee, visitor or guest experience, our system offers users a feature-rich, fully configurable digital signage application and IP video system in one.

Create

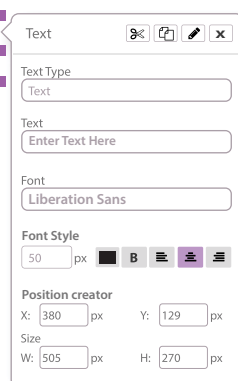

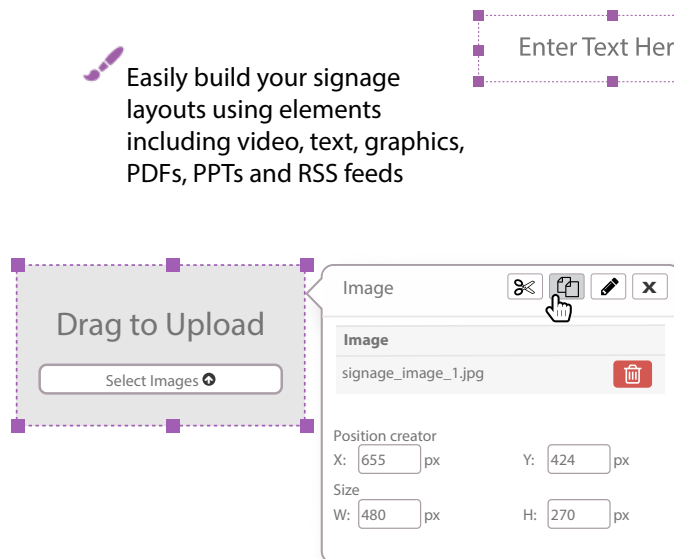

ArtioSign Create graphical screen editor on AvediaServer enables the creation of uniquely branded, tailored signage, with drag-and-drop ease

Easily build your signage layouts using elements including video, text, graphics, PDFs, PPTs and RSS feeds

Quickly design eye-catching signage with drag-and-drop elements:

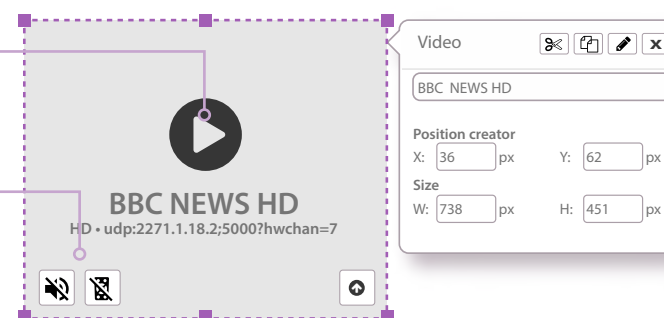

- Use the browser element to integrate HTML third party web data
- Add date and time with multiple formatting options
- Display the status of all London Underground lines, as well as London Overground, TFL Rail, Tram and DLR services (UK optional add-on)
- Include a single- or multi-page PDF document in your signage
- Add content easily by uploading native PowerPoint slides to your signage
- Add scrolling live news from any RSS feed
- Display text and image Tweets from a chosen Twitter username as a slideshow with configurable durations
- Display up to 5 days of weather and temperature in multiple locations

Create your own signage designs or choose from a selection of templates to get you started

Include live TV and Video on Demand in your signage

Enable/disable channel change via remote control and toggle 'mute' on/off

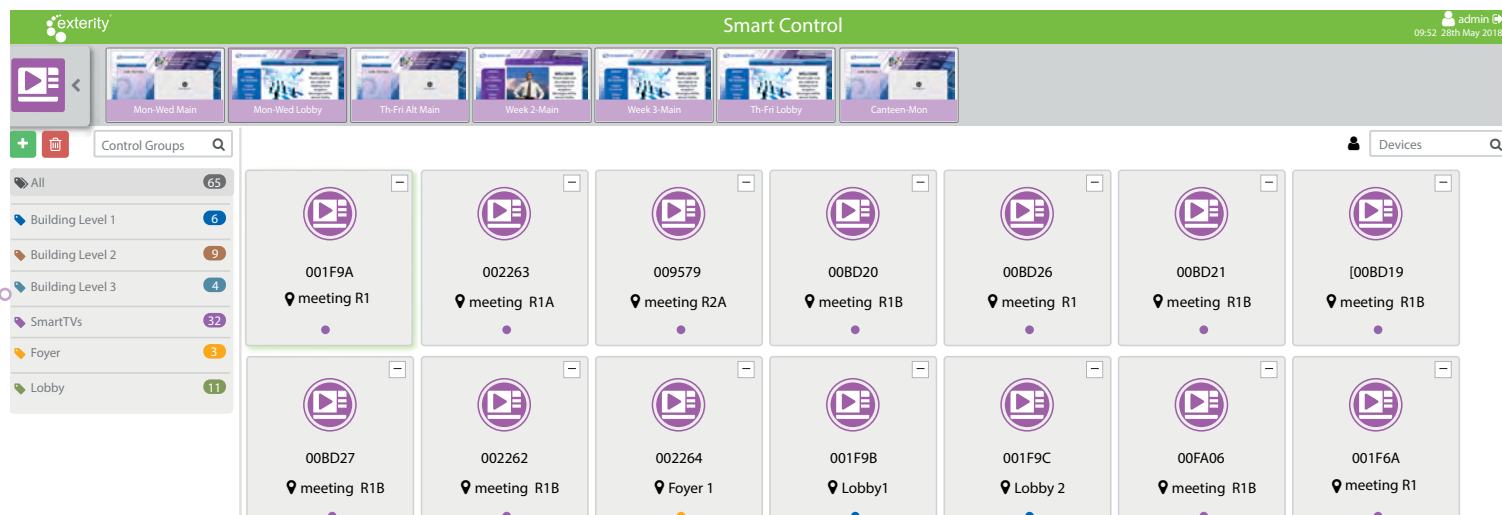

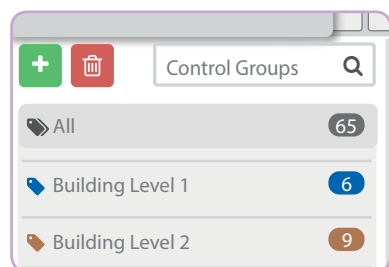

Restrict user access to edit specific layout elements

Manage

The Smart Control application* on AvedaServer lets you manage what is displayed on individual and groups of signage devices. Use ArtioSign Schedule to plan your signage campaigns

⚙️ Create groups of displays and quickly publish playlists to individual or groups of devices, with drag-and-drop simplicity

⚙️ Update signage on the move - change what is being displayed on screen using an iPad or Android tablet

⚙️ Override signage screens with emergency messaging to quickly communicate to a wide audience

* For more information, refer to the Smart Control datasheet

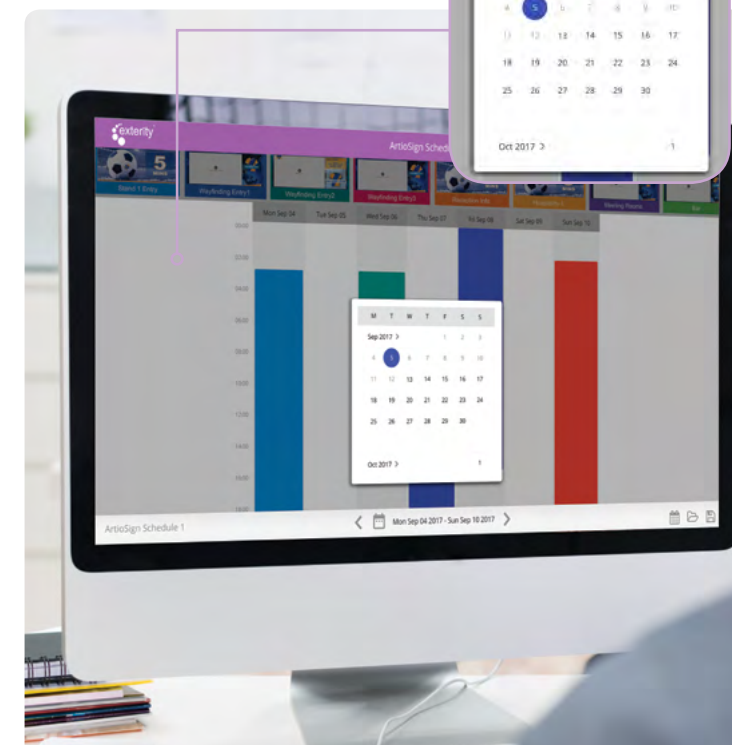

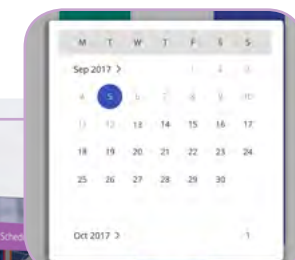

Schedule

Schedule your signage playlists to be displayed at different times to target your message to the right audience at the right time. Manage signage campaigns quickly and easily in ArtioSign Schedule

📅 Drag and drop playlists onto the timeline to create a signage campaign

📅 Quickly create signage campaigns with the ability to copy and paste days of the week or an entire week's schedule

📅 Schedule signage content up to a year in advance

⚙️ Maintain publishing control by restricting user access to specific signage groups

ADMIN CREATOR EDITOR

Display

ArtioSign Display enables you to turn any connected display into a digital signage delivery point. Publish content to a single end-point or a network of screens

Low power consumption and Power over Ethernet support make AvediaPlayer Media Players an economical choice for digital signage, compared to a traditional PC-based system

AvediaPlayer Media Players come with ArtioSign built in as standard: gain instant access to the digital signage functionality with simple licence-based activation

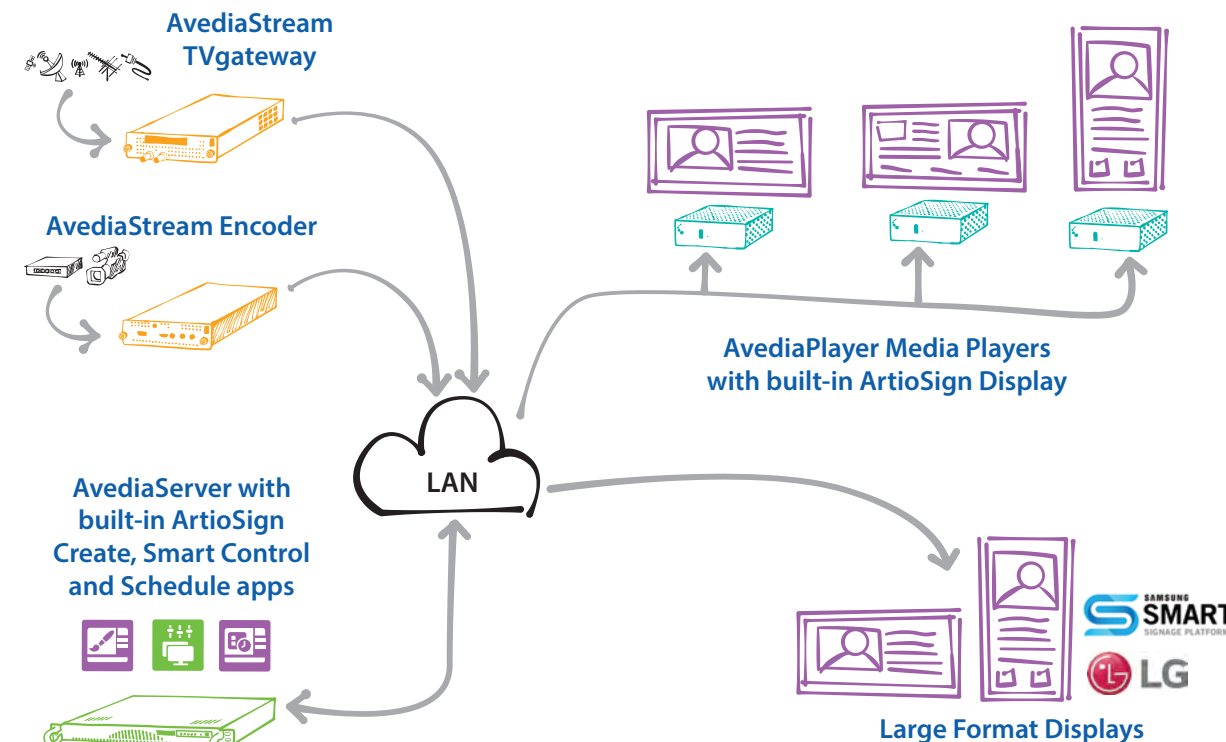

Maximise revenues by incorporating advertising into signage and display in targeted locations at optimal times

Deliver ArtioSign content straight to Samsung Smart Signage Platform and LG Large Format Displays (LFDs)

Integrate ArtioSign digital signage into your Exterity end-to-end IP video solution
